

MSc in Cybersecurity

Protect digital systems, networks and data.

Duration	2 Years
Level	Master's Degree
Mode	Full-Time
Intake	Twice a year
Total fee	NPR 8,50,000

Course overview

The MSc in Cybersecurity is designed to prepare students to protect digital systems, networks and data from cyber threats. It combines theoretical knowledge with practical skills in ethical hacking, network security and cyber defence strategies.

Key features

- Hands-on cybersecurity labs & simulations
- Ethical hacking and penetration testing
- Industry-relevant tools and techniques
- Real-world case studies
- Internship & career support

Core modules

- Network Security & Cryptography
- Ethical Hacking & Penetration Testing
- Cyber Threat Intelligence
- Digital Forensics
- Cloud Security
- Information Security Management

Career opportunities

Cybersecurity Analyst, Ethical Hacker / Penetration Tester, Security Engineer, Digital Forensics Expert and Information Security Manager.

Why study this program?

With increasing cyber threats worldwide, cybersecurity professionals play a critical role in protecting organizations, governments and individuals from digital attacks.

Fee note: Fees and admission policies are based on the supplied CEIC website content and should be confirmed with the admissions office before enrolment.
