

MSc in Artificial Intelligence

Shape the future with AI & innovation.

Duration	2 Years (4 Semesters)
Level	Master's Degree
Mode	On Campus
Intake	Fall & Spring
Total fee	\$4,500

Course overview

The MSc in Artificial Intelligence is designed to equip students with advanced knowledge in AI, machine learning and data science. The program focuses on theoretical foundations and practical applications to prepare graduates for high-demand careers.

Key features

- AI & Machine Learning — advanced algorithms and intelligent systems
- Data Science — big data, analytics and predictive modelling
- Global Opportunities — pathways to international careers and universities

Core modules

- Machine Learning
- Deep Learning
- Natural Language Processing
- Computer Vision
- Data Analytics
- AI Ethics
- Research Project
- Internship

Career opportunities

AI Engineer, Data Scientist, Machine Learning Engineer, Research Scientist and related roles.

Why study this program?

AI is transforming industries from finance and healthcare to manufacturing and technology. This program combines advanced concepts with applied work so graduates can contribute to AI-driven products and research.

Fee note: Fees and admission policies are based on the supplied CEIC website content and should be confirmed with the admissions office before enrolment.
